

smartPredict challenges

Assessments that boost candidate engagement

Engage candidates – measure their potential

To enhance candidate engagement, some organisations have turned to assessment games to provide a more fun user experience. However, they need to be careful. Assessing candidates during the hiring phase is a serious business – indeed, it is ‘high stakes’ for both parties.

Candidates want to:	Recruiters want to:
<ul style="list-style-type: none"> • Know that the assessment is robust and fair • Be taken seriously • Get immediate feedback • Be challenged and engage with the assessment • Have a hassle-free assessment experience on their mobile 	<ul style="list-style-type: none"> • Identify the best candidates in a reliable manner • Shorten assessment time • Engage with candidates • Differentiate themselves in crowded hiring market • Provide a legally defensible, fair and valid assessment process

smartPredict meets the needs of both candidates and recruiters

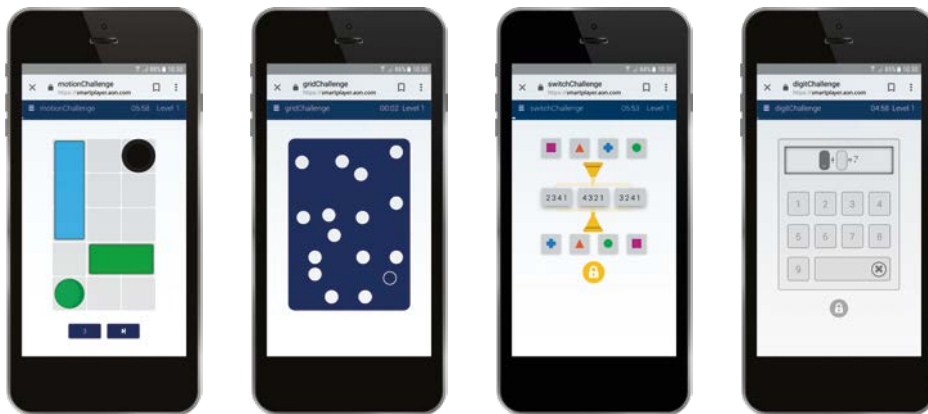

Enhanced candidate experience	Assessment confidence
<ul style="list-style-type: none"> • Designed for mobile • Quick, engaging and interactive • Provides immediate feedback • Progresses through challenges to new levels • Reflects the importance of the assessment – not the game 	<ul style="list-style-type: none"> • Robust psychometrics • High quality assessment with added game elements • Suitable for volume recruitment as each test is unique • Supports your brand with corporate identity elements

Engaging assessments with proven, robust psychometric results

- Purpose-designed for use on all types of mobile devices, tablets and computers
- Individually generated tests for each participant to prevent cheating
- Can be seamlessly integrated into existing recruitment workflow systems
- Available in a range of reporting options

Our solution: the smartPredict challenge series

Optimised for smartphones, *smartPredict* is a series of validated psychometric assessments which are enhanced with 'game-style' elements to make them more engaging for candidates. Research shows that assessments that are too 'gamey' are perceived as unprofessional. Having said that, certain gaming elements – such as progression through levels and immediate feedback – heighten candidate engagement. Each challenge in the *smartPredict* series can be used alone or in combination with others and also alongside other assessments. It is particularly liked by early career applicants who appreciate the challenge, interaction and mobile nature of the tests.

motionChallenge
measures planning
